ROAD ECOLOGY: CRITTER CROSSING
Research Guide

*You must complete a minimum of 5 notecards. Each notecard will be labeled with the type of evidence/research it contains.

*Your research must include at least 5-7 pieces of evidence to be included in your reflection paper. The more evidence you have the better and easier your reflection will be.

CHOOSE FROM THIS LIST BELOW

- Defining the problem (REQUIRED)
- Show evidence that your solution (design) maintains biodiversity
- Description of design or critter crossing
- Placement of your critter crossing
- Species usage
- Data set (species usage, cost of the design, etc.)
- Direct/indirect impact on humans

*TIPS FOR SUCCESS*

1. Stay on track with the timeline/checklist!
2. If you have extra time during a class period you need to gather more information!
3. Keep track of your resources as you go!
   (Use EasyBib to help you with APA citations)
