Kahoot

Kahoot is a game based classroom response system. You can create quizzes, discussions and surveys called Kahoots that can be played or taken using any device with a web browser.

Create an account

1. Go to the following link [https://getkahoot.com/](https://getkahoot.com/)

2. First time users will need to create a free account.

3. Select your role followed by your school, username, email, and password. Then select create account.

Getting Started

1. Go to the following link [https://getkahoot.com/](https://getkahoot.com/)

2. Select Sign In

3. Enter your username or email and password followed by sign in.

4. Select the type of Kahoot you want to create: Quiz, Discussion, or Survey.
   - You can search for already made Kahoots under Public Kahoots.

5. Select a name for your Kahoot.

6. Type the question and answer choices (up to 4). Mark the correct answer (you can select more than one).
   - You can decrease the number of answer choices by selecting the – sign.
7. Add an image to your question, decide if it’s a point question and select the time limit (minimum 5 seconds, max 120 seconds).

8. Select +Add question to add more questions to your quiz and repeat steps 6 and 7.

9. To save quiz, select save and continue.

10. You can then adjust the language, privacy settings, primary audience, description, difficulty level and tags. Then select save and continue.

11. Give your quiz a cover page by selecting an image followed by done.

Starting Quiz

1. Select My Kahoots.

2. Select Play. Adjust the settings on the following page and select Launch.

3. Students will go to the following link https://kahoot.it/#/ or Use the shareable link with students.

4. Students will enter the pin shown on your screen followed by their name.
   - As students join the game, their names will appear on your screen. Clicking on their names will kick them out of the game.

5. After all students have entered the game, select start now.
6. The question will appear, image if you have one, answer choice, timer and number of players that have answered the question.
   • Select next or wait until the timer runs out for the next question.

7. Select ‘end quiz now’ when finished. Students will have the option to rate their learning, recommend it and rate how fun. The teacher will receive this information.

8. Select Download results to view student scores. You can download the results to a Microsoft excel file.
